

# Pick Up and Play!

LSDj is arguably the most favored way to make music with the Game Boy. New users to the program would benefit greatly from a few study sessions with the manual or at least a friendly tutorial from a youtuber or peer. Unless you are already familiar with tracker programs, you may find yourself struggling to even put four on the floor.

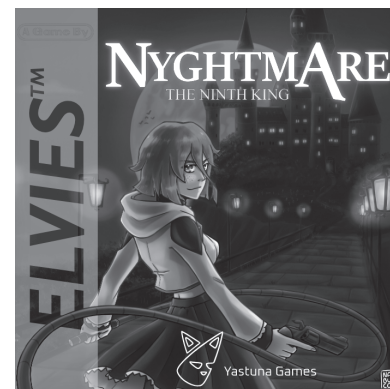

Here are a few programs that are a bit more intuitive. These programs will let your thumbs, ears, and eyes create melodies and/or beats on your first playthrough!
